

Surgical Worksheet

Date:	/ /
Time:	: am / pm

PRE-SURGICAL	
Patient:	
Age	Weight lb / kg
Procedure	
Surgical site	
Equipment safety check/surgical supplies:	
Yes	No
Allergies:	
Yes	No
If yes, which?	
Radiographs needed prior/completed:	
Yes	No
Bloodwork evaluated:	
Yes	N/A
Premedications:	
_____ mg	____:____ am / pm IV / SQ / IM
_____ mg	____:____ am / pm IV / SQ / IM
_____ mg	____:____ am / pm IV / SQ / IM
_____ mg	____:____ am / pm IV / SQ / IM
Induction agents:	
_____ mg	____:____ am / pm

SURGICAL	
Surgical site prep:	
Yes	No
Intra-op imaging needed and available:	
Yes	No
Antibiotic prophylaxis:	
_____ mg	____:____ am / pm
Gas anesthesia:	
Local analgesic:	
_____ mg	____:____ am / pm
Sterility indicators checked:	
Yes	No
Long-acting local analgesic:	
 <small>(bupivacaine liposome injectable suspension)</small> 0.4 mL/kg x _____ kg = _____ mL _____:____ am / pm	

NOCITA® (bupivacaine liposome injectable suspension)

- Long-acting local anesthetic with extended-release delivery of bupivacaine
- Provides up to **72 hours of post-operative pain relief** in one dose for dogs undergoing cranial cruciate ligament surgery
- A single-use 20 mL vial treats 1 large dog (50 kg), two medium dogs (25 kg), or four small dogs (12 kg)

POST-SURGICAL
Confirm procedure and post-op care:
Sponge/needle counts if indicated:
Samples:
Culture
Histopath (inked)
Suture material used:
Complications (including equipment):
Dispensed pain control/antibiotics:

Signature: _____
